

Supervised Autonomy **SHOWCASE**

SIGN UP!**28TH OF JUNE 2023 FROM 9 AM TO 4 PM | OULUZONE**

Supercharged operations through autonomy

SR-O TECHNOLOGY together with **TELEO INC.** transforms heavy equipment operations by turning any piece of construction equipment into a supervised autonomous machine - resulting in greater performance, efficiency, and insight than ever before. ***Come and see Europe's first automated wheel loader in action at Ouluzone at the end of June!***

DURING THE DEMO DAY is possible to get to know the **MINEROBOTIC** project which will develop a digital learning environment for mining automation and robotics. There is no similar training in the Northern Ostrobothnia region yet, a significant need is seen. The project explores and acquires new knowledge and skills in mining automation to create a new learning environment and course.
